

CSE 4126
Online 03 | Section: A2
Marks 10 | Time: 45 Minutes (40+5)

Instructions – Please run the MID2.sql file to create and insert the data at first.

eid	did	pct_time
13	2	100
20	2	25
11	1	50
18	1	25
17	4	100
11	5	50
18	5	75
20	6	50
16	6	100

Works

did	dname	budget	managerid
1	Hardware	1000	11
2	Operations	5000	13
4	Marketing	6000	16
5	Software	6000	17
6	Production	6000	20

Dept

User will give **eid** as input. Your task is to print the maximum budget among all the departments in which the person with that **eid** works. If the **eid** does not exist, print “Not Found”.

For example, if user gives input eid = 11, then the answer will be 6000. Because eid = 11 works in did = 1 and did = 5 and did = 5 has maximum budget.

Sample input/output:

input	output
11	6000
20	6000
13	5000
50	Not Found

You must use cursor to solve this problem.
